• Senior Software Engineer •

ABOUT ME

I have more than 8 years' experience working on software development projects.

I've worked with different methodologies such as SCRUM, Agile and RUP. Over those years he gains experiences working with SharePoint, C#, React, SQL, JavaScript, etc.

For me is important to feel as a team player and that can be seen in the way I lead my team, I like to help the team to generate a synergy to ensure they are delivering on the expected time with the best quality, but having in count we are working with human beings.
